TECH TIPS - GIVE YOUR HEAD A PORT JOB - PART 1

A better breathing engine is a key factor to more horsepower. The internal combustion engine is nothing more than an air pump, and the combination of parts comprising the pump are critical. The cylinder head of a four-stroke engine is made up of intake ports and intake valves, and exhaust ports and exhaust valves. This is how the air pump breathes. Camshafts actuate the valves, telling the head when to inhale and exhale. The fuel/air mixture enters through the intake ports and exits through the exhaust ports, so the shape of these ports greatly affect an engine's breathing characteristics. **Why should a motorcyclist invest money into porting their bike's cylinder head?** Mass produced stock

motorcycles have cylinder heads with generic port shapes. The rough angles left behind by the casting process hinder the performance of the engine, leaving horsepower on the table. Part 2 next issue. *Interview with Star's Derek Churchwell published in 2 Wheel Tuner Magazine*

ADRL HOUSTON REPORT

"We went to our 1st ADRL Pro Extreme Motorcycle race of the 2010 season this past week (March 19-20). Jeff, Anne, Ken, Mitch and I all got to the the Pilot Travel Center in Baytown, Texas on Thursday afternoon. We parked the big red rig and set up our Star Racing display out front of the big store/McDonalds and let kids sit on the bike for photos and gave away lots of race tickets.

FEATURED PRODUCT:

S&S 96" ENGINE - INDUSTRY STANDARD

S&S offers an updated version of the V96 that makes it an even better value and a better "daily driver". The main difference is the replacement of the SuperStock® cylinder heads and domed piston with S&S Performance Replacement heads and a flat topped piston. The design of the combustion chamber and piston used with the new heads make the new V96 less prone to knock. That's a real plus in hot weather and in touring applications when the selection of fuel may be limited. Special pricing makes the V96 competitive with imported engines. Click on the engine page at www.starracing.com for more info. Call 800-841-7827

FREE FHS MOTORCYCLE SCHOOL

Buy A Shirt - Win A School !!!

Spend \$10 or More on Apparel, Parts or anything at Star Racing and Enter to Win.

3rd Place - \$250 Gift Certificate for Parts or Services at Star Racing

Call 800-841-7827 for more information.

NEW PRODUCT:

BMC Air Filters: BMC air filters are designed and produced to ensure a higher air flow than original paper filters. BMC air filters, made of cotton, minimize the loss of air flow pressure passing through the air filter; this ensures the best conditions for full exploitation of maximum power. Filters are available for ZX, GSX-R and Hayabusa. Call Reed at 800-841-7827 for more information check out the Star online store.

VENDOR SPOTLIGHT:

When you require the best, count on The World Leader in spark plug technology NGK Spark Plugs. They offer the highest quality products for virtually every vehicle application. Count on NGK Spark Plugs to deliver the finest quality products. Star Racing stocks the plugs you need. Call Reed at 800-841-7827 or shop the Star online store.

GARAGE SALE:

2007 GANGSTER FOR SALE:

Suitable for AHDRA 124" class. Pro Street Frameworks chassis. S&S 124" engine with B2 heads. Engine built by G2/Star Racing. Motorcycle built by G2/Star Racing. Call Derek 800-841-7827. Check out the News page at www.starracing.com for more garage sale items.
