

Star Racing Announces GSX-R1000 SB6 Ignition System

Fits 03-08 Models

Wednesday, August 19, 2009

SB6 Programmable Ignition System for GSX-R1000

Melt the pavement with the new MSD ignition installed on your Suzuki 2003-2008 GSX-R1000. Once plugged into the factory harness, you can plug your PC to the USB port and start mapping up to 10 combinations. You can program timing maps, rev limiter, shift points and much more with the easy to use Pro-Data + software.

Special Features:

- Direct Plug-in Connectors
- Fully Sealed Controller
- Time Programmable Rev Launch Limiter
- 0-15 Degrees Programmable Time Based Progressive Nitrous Retard
- Built-in Engine-Run Hour Meter
- Advance/Retard of OE Timing
- 15 Seconds of Data Acquisition
- Programmable Shift Light Output Per Gear
- Advance or retard the factory timing +6°-20°
- Load up to 10 timing curves
- On-board data acquisition
- Set rpm points for shift light and intensity of light
- Plug-n-play installation
- Sensor input 0-5 volts for TPS, O2 or Map Sensor
- Shift kill and shift kill delay

Available direct from Star Racing – Call 800-841-7827
